#### **DETAILED ACTION**

#### Response to Amendment

- 1. The amendment and written response filed on 11/04/2004 has been entered.
- 2. Claims 1 and 18 have been cancelled.
- 3. Claims 35-44 are newly added.
- 4. Claims 2-17 and 19-44 are pending.

## Response to Arguments

5. Applicant's arguments see Remarks pages 17-19, filed 11/04/2004, with respect to claims 3 and 20 have been fully considered and are persuasive. The rejection of claims 3 and 20 has been withdrawn.

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 6. Claim 35-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
  - a. With regard to Claim 35, the explanation with regard to limitation "radar image" is nowhere to be found in the specification. Additionally, there is no explanation with regard to the processing of "comparing the *non-moving objects from the*

radar image with the object parameters of the stationary object". The closest

explanation in the specification, page 7, lines 9-10, discloses the radar sensor

reports the position and relative motion of the object, and compares the position

and the relative motion of the object with the features extracted from the input

image, such comparison is greatly different from "comparing the non-moving

objects from the radar image with the object parameters of the stationary object"

because the plain meaning of "non-moving objects from the radar image" is there

are actually objects displayed in the radar image. Since there is no radar image,

there will be no objects displayed in such image. The applicant is advised to better

amend the claim limitations to reflect the scope of the claim.

b. Claims 36-39 are rejected as being dependent upon Claim 35.

c. With regard to Claim 40, see explanation in Claim 35.

d. Claims 41-44 are rejected as being dependent upon Claim 40.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 7. Claims 35-44 are rejected under 35 U.S.C. 112 2<sup>nd</sup> paragraph.
  - a. Claim 35 recites the limitation "radar image" in line 10. There is insufficient antecedent basis for this limitation in the claim.
  - b. Claims 36-39 are rejected as being dependent upon Claim 35.
  - c. Claim 40 is rejected for the same reason given in Claim 35.
  - d. Claims 41-44 are rejected as being dependent upon Claim 40.

## Allowable Subject Matter

8. Claims 2-17 and 19-34 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

- a. Independent claims 3 and 20 are allowed based on the convincing arguments recited in the Remarks, pages 17-19, filed on 11/04/2004.
- b. Claims 2 and 4-17 are dependent upon Claim 3.
- c. Claims 19 and 21-34 are dependent upon Claim 20.
- 9. Claims 35-44 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
